

# Handle growing data needs

HPE Solutions for Shared Storage

## Expand on demand

In today's digital and connected world, businesses of all sizes need to manage data that's constantly streaming in from a variety of sources.

All that data can be used to drive the business forward. But storing growing data and making it accessible for employees when they need it can be a drain on IT budgets and staff efficiency.

But as storage costs skyrocket, users complain about slow application performance and availability. If you struggle

to maintain sufficient storage capacity or need to share that capacity with multiple servers, it may be time to consider adding dedicated external shared storage to your technology mix.

External shared storage allows you to extend storage capacity without purchasing additional servers—maintaining budget for more pressing matters. It also enables multiple servers to access the same storage for high availability.

HPE Solutions for Shared Storage make it easy and affordable to expand to handle growing data.

#### HPE Flex Offers

Maximize your savings with HPE Flex Offers.

#### iQuote Universal

Browse popular HPE server, storage, and networking products and [create fast, accurate configurations](#) that you can export to request a quote.

#### Get the IT you need, now

[HPE Financial Services](#) offers simple IT equipment financing, asset lifecycle solutions, and finance options designed to help SMBs seize opportunities to evolve and thrive.

#### Simplify with services

[HPE Pointnext Services](#) help you tap into the expertise to simplify operations and do more with less. HPE Pointnext Services help you innovate to keep ahead of risks like competitive and security threats. A variety of offerings—from advising on best practices and project-based engagements to operational support services—keep your environment running efficiently and reliably.

## Increase performance and lower costs

HPE Solutions for Shared Storage are based on HPE MSA Storage as the data storage backbone, with [HPE ProLiant](#) rack servers providing the processing power for virtualization, database, and file and backup workloads.

Connectivity is available in a variety of methods to meet your budgetary and performance needs:

- Fibre Channel for traditional storage area network (SAN)
- iSCSI via SFP+ and 10G Base-T leveraging Aruba Instant On networking
- SAS for low-cost connectivity for up to four servers

These solutions enable:

- **Scalability:** Cope with sudden data growth using a solution that easily grows storage capacity from tens to hundreds of terabytes.
- **Availability:** Connect multiple servers for redundant workloads and get back

up and running quickly in the event of a disaster with reliable backups of data and applications.

- **Versatility:** Support virtualization, database, or file and backup needs by choosing a solution with external storage.

## Easily evolve to hybrid cloud

HPE Solutions for Shared Storage can be easily extended to hybrid cloud for additional disaster recovery options with cloud services from Microsoft Azure or a managed service provider.

## Your storage, your way

HPE Solutions for Shared Storage let you grow storage easily and be prepared for anything. Contact your authorized HPE representative to find out more.
